### Description

## Description

OpenCart is free open source e-commerce platform for online merchants. OpenCart provides a professional and reliable foundation from which to build a successful online store. This foundation appeals to a wide variety of users; ranging from seasoned web developers looking for a user-friendly interface to use, to shop owners just launching their business online for the first time. OpenCart has an extensive amount of features that gives you a strong hold over the customization of your store. With OpenCart's tools, you can help your online shop live up to its fullest potential.

In the Sales module you can see information about:

- orders
- recurring orders
- returns
- customers
- gift vouchers
- paypal

### Description

## Description

When a customer goes through checkout, the information on their order is automatically transferred to the Orders section for you to keep track of. In the administration, you can view all of the orders made on their site, manually add orders, or edit the details of existing orders

Viewing order details

The Orders section is located under Sales > Orders. On this page, every order ever made from the store is listed in detail.

The following details are displayed for each order on the list:

- Order ID: a number assigned to an order by OpenCart during the checkout confirmation
- Customer: the name of the customer that made the order.
- Status: update of the status of the order. After the order is initially created the status will be "Pending". The default options are Missing Orders, Canceled, Canceled Reversal, Chargeback, Complete, Denied, Expired, Failed, Pending, Processed, Processing, Refunded, Reversed, Shipped, and Voided.
- Total: the total price of the order.
- Date Added
- Date Modified

### Description

## Description

Customer Orders will be automatically updated to the Order section after a customer confirms checkout. Though it is automatically updated, you may want to edit or add orders manually to add new information such as a gift-voucher, or add reward points. To manually add a new order, click the "Insert" button.

### Description

For the Customer details page

Preconditions:

1. The Opencart demo application is up and running
2. An admin user is created (demo/demo)

Reproduction steps:

1. Access Opencart demo web app <https://demo.opencart.com/admin>
2. Login with the following username and password - username: demo / password: demo
3. Access the Sales menu
4. Click on the Orders -> Add new button
5. Click on the button near the Shipping Address
6. The following fields should be marked with \* as mandatory fields : first name, last name, address 1, city, country, region/ state

Expected results: A \* appears near the following fields: first name, last name, address 1, city, country, region/state. They are all the mandatory fields.

Actual results: There are no \* marks for the mandatory fields.

For the Add voucher page:

Preconditions:

1. The Opencart demo application is up and running
2. An admin user is created (demo/demo)

Reproduction steps:

1. Access Opencart demo web app <https://demo.opencart.com/admin>

2. Login with the following username and password - username: demo / password: demo
3. Access the Sales menu
4. Click on the Orders -> Add new button
5. Click on the + button under the Action to add a product
6. Select Vouchers section
7. Verify if the recipient's name, recipient's e-mail, sender's name, sender's e-mail, gift certificate theme, amount fields are marked with stars as mandatory fields

Expected results: the recipient's name, recipient's e-mail, sender's name, sender's e-mail, gift certificate theme, amount fields are marked with stars as mandatory fields.

Actual results: There are no \* marks for the mandatory fields.

For the Shipping Address page

Preconditions:

1. The Opencart demo application is up and running
2. An admin user is created (demo/demo)

Reproduction steps:

1. Access Opencart demo web app <https://demo.opencart.com/admin>
2. Login with the following username and password - username: demo / password: demo
3. Access the Sales menu
4. Click on the Orders -> Add new button
5. Click on the button near the Shipping Address
6. The following fields should be marked with \* as mandatory fields : first name, last name, address 1, city, country, region/ state

Expected results: A \* appears near the following fields: first name, last name, address 1, city, country, region/state. They are all the mandatory fields.

Actual results: There are no \* marks for the mandatory fields.

For the Payment Address

Preconditions:

1. The Opencart demo application is up and running
2. An admin user is created (demo/demo)

Reproduction steps:

1. Access Opencart demo web app <https://demo.opencart.com/admin>
2. Login with the following username and password - username: demo / password: demo
3. Access the Sales menu
4. Click on the Orders -> Add new button
5. Click on the button near the Payment Address
6. Verify if the following fields are marked with \* as mandatory fields : first name, last name, address 1, city, postcode, country, region/state

Expected results: A \* appears near the following fields first name, last name, address 1, city, postcode, country, region/state. They are all the mandatory fields.

Actual results: There are no \* marks for the mandatory fields.

**Epic Link:** The Sales module

### Description

Preconditions:

1. The Opencart demo application is up and running
2. An admin user is created (demo/demo)

Reproduction steps:

1. Access Opencart demo web app <https://demo.opencart.com/admin>
2. Login with the following username and password - username: demo / password: demo
3. Access the Sales menu
4. Click on the Orders -> Add new button
5. Click on the button near the Customer to add details about it
6. Left empty the telephone field and click on the Save button
7. Click on the button near the Payment Address
8. Left empty the postcode field and click on the Save button

**Expected results:** An error message should appear notifying the user that the phone number and the postcode fields are mandatory

**Actual results:** The telephone field and the postcode fields are not mandatory, an error message does not appear, a customer can be added without a telephone number and without a postcode.
